PROFILE

Industrial engineer with a cross-functional and multidisciplinary background, specialized in product development, technological strategy, and innovation applied to sports. Experience in technical leadership, team coordination, supplier management, and validation of solutions in real contexts. Actively involved in the creation, scaling, and strategic direction of a startup with international projection.

WORK EXPERIENCE

Voon Sports

Chief Technology Officer (CTO) — 2023 - PRESENT

- Defined the company's technological strategy and led the development of new interactive products focused on sports performance.
- Coordinated hardware, firmware, software, and design teams to ensure technical consistency and product scalability.
- Directed R&D&I projects from ideation to industrialization, including technical validations, manufacturing, and quality control.
- Managed national and international suppliers: selection, technical negotiation, and monitoring during prototype development and scaled production.
- Supervised the technical support and after-sales team, ensuring a high-quality and responsive user experience.
- Collaborated with clients, distributors, and stakeholders in international markets: France, Italy, Germany, the UK, Chile, and the USA.
- Led and executed an official case study with Real Sociedad, working alongside the club's technical team to validate features and real use cases.
- Participated in strategic business decisions, commercial planning, international expansion, and roadmap definition.

Product Manager | Product Development Engineer — 2019 - 2023

- Led technical evolution of main products, coordinating with technical teams across product life cycle stages.
- Programmed and optimized product control software using PLC (Tia Portal – Siemens), improving reliability and logic.
- Designed Power BI dashboards to analyze real sports session data and drive product improvement.
- Programmed in Python to implement enhancements, resolve technical issues, and optimize product functionality and control.

Engineering Intern — 2017 - 2019

- Developed initial in-house software for data visualization and analysis applied to sports training.
- Optimized the product's data capture, storage, and analysis systems.
- Collaborated with the founding team during the startup's early stages, contributing to key product and technical strategy decisions.

Sunion - Co-Founder & Project Engineer — 2023 - 2024

- Co-founded a company specialized in photovoltaic solutions.
- Responsible for technical calculations, project design, and system sizing.
- Managed subsidies, feasibility analysis, and administrative procedures for energy self-consumption.

C.D. Vasconia - Coordinator, Coach & Sports Director — 2015 - PRESENT

- Youth football coach and coordinator: managed groups, coached coaches, and contributed to the club's sports direction. UEFA B licensed coach.
